

NX11 PRO Water Pipe Leak Detector For Plumber

Electronic pipe leak detection device using acoustic sound technology for detect underground pipe leaks

Device designed for plumbers is easy leak detection equipment. You will hear broken cracked water pipe leak sounds under concrete. Easy using control panel and NEW 6" MAGNET ROD included. Have high quality headphones for best sound quality.

Fluid escapes, from **cracked pipes**, under pressure produces a "distinct tone". This signal, will be recognized easily and accurately by **Device amplifiers** and high sensitivity settings in order to determine the location of the "water leaks". With this leak locator sensitive listening ability It features a device that will listen deeply to detect even the slightest of water pipe leaks. This leak listening machine has an ultra sensitive hearing

And thats the reason pipe leak detection will detect even the most delicate sound of water leaking from the **floor surface** or wall for that matter. Have has a new vibration sensor, which is responsible for hearing faintest of water leakage sounds.

Device allows easily identify every surface in the under concrete floor or wall You will find, **cracked pipe**, in bathrooms, "kitchens, toilets within a period of 5 minutes". All **cracked pipes** to a depth of 11 inches in concrete will be find easily with this device.

Water pipe leakage occurring will be identified as the point in the bathroom. NX11 underground leak detection device has an ultra sensitive hearing In kitchen where you will find them on the surface due to surface mount cabinet as a point in the **lower water pipe leakage**.

You will easily use in the determination of water pipe leak occurred in the toilet. **Glazed tile in the tile surface concrete, surface**.

This device is acoustic powerful listening instrument

Device uses, high quality headphones to detect leaks in **water transmission pipelines**. The result of advanced audio engineering techniques and expertise in the frequency spectra of leak sounds, This device is value-engineered for low cost and high performance
